DETAILED ACTION

This Office action is in response to the application filed March 27, 2002.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jp-59-184337 (TAKEMOTO et al).

The claimed invention is drawn to a radiation sensitive resin composition comprising (1) (a) an alkali-soluble resin having no epoxy group and (b) a 1,2 quinonediazide compound, and (2) being for forming an insulating film for an organic EL display element.

TAKEMOTO et al anticipates the claimed invention by disclosing a radiation sensitive resin composition having an alkali-soluble resin with no epoxy, a 1,2-quinonediazide compound, see the abstract for the disclosure of the phenolic resin and a polyphenolic ester of a 1,2 quinonediazide. No weight is given to the intended use language of the claim for forming EL displays. The claims are met by the prior art, no claims are allowed.
